La cité des sciences et de l’industrie

The exhibition halls: covering an area of 30,000 m², both temporary and permanent exhibitions are organised around the major themes of science, technology and industry.

La Cité des sciences et de l'industrie provides the necessary learning tools to better understand the world in constant change around us. Each exhibition space is open to all age groups, from junior to senior, from tourists to professionals/researchers or to the simply curious...

The City of Science and Industry, Europe's largest science museum with 3.5 Million visitors,

The Children's city “La cité des enfants” and science and technological library “BSI” are designed to initiate children to the world of science and technology, to reply to their questions, to stimulate their curiosity and awareness, their desire to read and do research.
Science and technological library

- 1 million visitors / year
- 8000 subscribers
- 124,000 records in (STI)
- 3000 films on-site consultation
- 250 self-study CD-ROMs
Open Science Resources was a project that brought museums and educational institutions together in an effort to create a repository for open educational content.
2014 - Mobilearn: Augmented reality in the service of informal learning

**Concept**

Mobile application with indoor location and 3D augmented reality. Mobilearn is for libraries and museums, the application includes an interactive 3D map of the location and a typical representation of 3D data Mobilearn collections.

**Advantages**

- Transposable solution
- Multi-devices
- Low cost

**Services**

- Search for information, a document, a service
- Access the associated metadata
- Understand the concepts, interact with other users
- Save references
- Share on a social workspace (opinions and experiences)
- Participate in the life of the library
Different levels of information

4 views modes
3D Augmented reality

- Info pratique
- Clusters documents "Ma BSI"
- Sections thématiques
- Localisation / centrage
- Document mis en avant
- Nouvelles conversations
- Verrouillage camera
